

Central New York Large Scale Railway Society

Jim Leach, President

The club layout is located in a former shopping mall that is now a mega-brand car dealership. The G Scale freelanced layout spans 2400 square feet and features 6 tracks with several loops and a large switching yard. It is totally scened with mountains reaching close to 15 feet in height! Control is by both DCC and DC, with some battery driven locos. Visitors should use the "Green" entrance between the Lincoln dealership and Mazda on the south side of the complex. The physical address is: 5885 Circle Drive E Cicero NY 13039 and the GPS coordinates should be: N 43 degrees 08.961' W 076 degrees 06.912'.

Layout at a glance

Name: CNYLSRS

Scale: G

Size: 40' X 60'

Era: mid century to modern

Style: freelanced walkaround

6 tracks for large scale trains

outer loop – 11' and 12' curves

middle loop – 10' curves

Control: DC - Train Engineer & Revolution

DCC – Revolution

Various battery powered systems

Operating positions: 6 total Spots (not including the dispatchers)

Some jobs will work in pairs with engineer and brakeman while some mainline trains require only one operator.

- Through Freights
- Locals with switching
- Yard Switching
- Passenger runs

Comments:

This is a unique opportunity to run big trains through big scenery in a totally accessible environment with a coffee shop just across the hall.
